PROFESSIONAL SUMMARY

Junior Full-Stack Software Engineer with hands-on experience building web applications using Angular, React, and Django. Strong foundations in REST APIs, SQL, and database-driven application development.

EXPERIENCE

Medico International Services, Software Engineer (End-of-Studies Project) - Designed and developed a digital healthcare platform using Angular and Django REST Framework, implementing JWT authentication, relational data models in PostgreSQL, and core scheduling and treatment workflows. - Implemented real-time notifications and messaging using Django Channels, WebSockets, and Redis, integrating AWS S3 for media storage. - Integrated an AI-powered image analysis feature using YOLO, performing testing, debugging, and API validation to improve reliability and data consistency.	2025 – 2025 Tunis,Tunisia
IC CANADA, Software Engineering Intern (Remote) - Developed frontend components in Angular and backend REST APIs in Django for an enterprise BI and ERP platform, integrating relational database functionality via SQL. - Worked on business data flows, API development, and reporting functionality, maintaining consistency across application and database layers. - Collaborated in standups and planning sessions; performed root-cause debugging and bug fixes.	2024 – 2024

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, React.js, Java, C/C++, Angular, Django, FastAPI , Spring Boot, REST APIs, WebSockets, OOP	Databases & Data Systems: PostgreSQL, MySQL, SQL, Redis, Data Integration
DevOps & Cloud Systems: Linux (Ubuntu), Bash, Git, GitHub Actions, Docker, Jenkins, CI/CD, AWS S3	AI, Testing & Engineering Tools: Machine Learning, Computer Vision (YOLO), Postman, Swagger/OpenAPI, SonarQube, Prometheus, Grafana, Debugging & Troubleshooting, UML

EDUCATION

Software Engineering Diploma, ESPRIT	2022 – 2025
Physics & Chemistry Preparatory Studies, IPEIT	2019 – 2022

LANGUAGES

English: Fluent C2 | French: B2 | Spanish: Basic | Arabic: Native

PROJECTS

TheExperience — Music Discovery & Visual Experience Platform, <i>React · TypeScript · FastAPI · Async APIs</i> - Built a full-stack music discovery and visual experience platform integrating Last.fm, MusicBrainz, and Cover Art Archive through an asynchronous search and album-enrichment pipeline. - Developed an interactive React/TypeScript experience with debounced search, keyboard navigation, persistent recent albums, dynamic artwork, and palette-driven visual effects. - Engineered a FastAPI backend with concurrent API requests, multi-layer caching, search ranking, rate limiting, timeouts, and graceful degradation for third-party API failures.	2026
Kaddem — Colocation & Carpooling Platform, Spring Boot · Angular · CI/CD · Docker - Developed a full-stack carpooling and colocation platform using Spring Boot and Angular, implementing user management, matching, and reservation workflows. - Built a CI/CD pipeline around the project with Jenkins and GitHub Actions, integrating automated testing and code quality analysis (SonarQube), plus system monitoring (Prometheus, Grafana).	2025 – 2025

CLUB LEADERSHIP EXPERIENCE

Chairman — IPEIT Club (2021-2022) - Organized "Road to 5.0," an AI/Industry 5.0 event .	
Chairman — DeepFlow Club, ESPRIT (2023-2024) - Led AI-focused student org; organized "AI for All" and "AI HackFlow 2.0" (City of Sciences Tunis)
